

Your vocabulary for this episode of Music To Our Ears by Lingokids:

an herbivore - is an organism that mainly eats plants. Herbivores vary in size from small, like bugs, to large, like giraffes.

a carnivore- is an organism that mostly eats meat, or the flesh of animals. Sometimes carnivores are called predators.

fossils - the preserved remains, or traces of remains, of ancient organisms. Fossils are not the remains of the organism itself! They are rocks.

extinct - a species of animal or plant that is extinct no longer has any living members, either in the world or in a particular place.
