

THE WATER CYCLE

4-5-6 YEAR OLDS

With your teacher's help, cut and color the images below, then glue them in the right order:

1

2

3

4

5

THE WATER CYCLE

6-7-8 YEAR OLDS

Match these statements with numbers 1-6 to to put them into the correct order:

- Water falls into rivers and oceans 1
- Water evaporates (the water turns to vapor) 2
- The sun heats up the water 3
- It rains/snows 4
- It cools down and it turns into a cloud 5
- And it repeats again and again 6

After watching the video, can you explain why sometimes it rains while other times it snows? What does it depend on?

Look up the meaning of the 3 words below. The blue arrows in the drawing represent them. Write the words where they belong:

EVAPORATION - CONDENSATION - PRECIPITATION
